

Turbo Root WG

Complete Starter fertiliser containing Humic Acids, L- α Free Amino Acids, NPK and EDTA micro-nutrients, 100% soluble

Description

- Complete root stimulating starter fertilizer for vigorous start to season and reduced transplant shock
- Unique product taking strength from each of Tradecorp's Ranges: Humics, Biostimulants, EDTA Chelates and Water Soluble Fertilizers
- Humic and Fulvic Acids from Tradecorp's Humifirst Range to stimulate roots
- L- α Amino Acids from Tradecorp's Biostimulant range supplemented with P & K to reduce transplant shock
- Complete suite of EDTA chelated micro-nutrients from Tradecorp's Chelate Range for rapid growth
- 100% instantaneously soluble wettable granule (WG), no blockages
- Suitable for use in all drip irrigation, soil spray equipment and water wheels
- Suitable for use on all crops particularly horticultural transplant crops
- Suitable for use on all soils and potting media
- Production facilities certified to ISO 9001 & ISO 14001
- Guaranteed contents
- 3 x 5 kg and 20 kg bags

Main benefits

- Turbo Root WG is a simple, effective and complete solution to all crop establishment requirements
- Turbo Root WG ensures even and successful establishment promoting a vigorous start to the season
- Humic and Fulvic Acids stimulate root elongation and secondary branching in seeds and transplants
- L- α Free Amino Acids reduce transplant shock and promote vigorous growth
- P and K further enhance root growth and promote strong stems
- Micronutrients in easily absorbed EDTA chelates form that also remain available in the soil solution
- Suitable for use in all field and nursery situations
- Easy to use powder, no rinsing of packing

Technical specifications

- Total Humic Extract (THE): 29.1% w/w
- Humic Acids: 14.0% w/w
- Fulvic Acids: 15.1% w/w

- L- α Free Amino Acids: 22.2% w/w
- Organic nitrogen (N): 3.0% w/w
- Phosphorus (P): 7.1% w/w
- Potassium (K): 14.9% w/w
- Iron (Fe) EDDHA: 0.1% w/w
- Manganese (Mn) EDTA: 0.2% w/w
- Zinc (Zn) EDTA: 0.2% w/w
- Molybdenum (Mo): 0.25% w/w

Turbo Root WG

Dosage and Method of Use

Drip Application

General Dose	2 – 4 Kg/ Ha	2-3 applications every 7-10 days after sowing or transplanting during the initial stages of the crop
Strawberry	2 – 4 Kg/ Ha	3-5 applications from transplanting of the root stock every 7days
General Dose (Poly Tunnel)	0.8 – 1 Kg/ 2000m ²	3-5 applications from transplanting every 10-14 days. Use 800 g Turbo Root for 6000 plants or 1 kg for 8000 plants
Banana	2.5 Kg /Ha	5-6 time from planting until bell formation

Water Wheel

General Dose	0.5 Kg/ 100L	1 application using water wheel at transplanting
--------------	--------------	--

Potting mix

General Dose	1 Kg/ m ³	1 application. Spray onto substrate during preparation or mixing
--------------	----------------------	--
